### There are a number of ways to save water, and they all start with YOU.

It's easy to take water for granted with our plentiful rainfall, but it is important that we each do our part to use water wisely. In our region water use nearly doubles from May through September, primarily due to outdoor use for lawns and gardens. Please use water wisely.

Most water conservation is simple and inexpensive - just a few conscious water use choices go a long way. Use the conservation tips printed on the calendar or contact your water provider for additional tips. Start saving today.

**Conservation Programs: Contact your water service provider for information.**

For the purchase and installation of an approved high efficiency toilet which uses less than 1.3 gallons per flush.
